16 inch	25/12 37 coals	26/13 39 coals	27/14 41 coals	28/15 43 coals	29/16 45 coals	30/17 47 coals

How To Read This Chart:

*The top fraction number is the amount of coals required to place on top of your cast iron Dutch oven lid. They are usually flat for this purpose.

*The bottom fraction number is the amount of coals required to place underneath your oven. They usually have little legs to elevate for this purpose.

*Use the coal temperature chart according to the size of your oven with what temperature you want to cook with.
